The Board of Directors therefore approved the issuance of newly-issued shares to the existing shareholders in order to use the proceeds received from such capital increase to use as working capital and to accommodate the Company's business plan, such as the adjustment of fleet, including the expansion of routes and flight network, to enhance higher potential of competitiveness of the Company.

The Company expects that the issuance and offering of the shares to existing shareholders (Right Offerings) and the obtaining of proceeds from the offering of such newly-issued ordinary shares will occur within mid-February 2019.

(3) Reasonableness of the capital increase, plan to utilize the proceeds derived from the offering for sale, and projects to be operated, including the sufficiency of the sources of funds

The Company has necessity to raise additional fund approximately Baht 2,500,000,000, to accommodate the business plan of the Company, whereby the Company has the plan to improve the fleet, and expand the routes and flight network to build potentials for the competition with other business operators and reduction of loan amount, causing the Company to have necessities additional working capital. After consideration of fund raising alternatives, the Board of Directors was of the view that the offering of newly issued ordinary shares to existing shareholders (Right Offerings) is the most suitable fund raising alternative for the Company's current situation, as the Company has been operating at losses and has negative equity from the financial statements ended 30 September 2018. In this regard, should the Company raise fund for approximately Baht 2,500,000,000 from this offering of capital increase shares, it will have sufficient fund for aforesaid business plan.

(4) The potential impact which may occur to the business operation of the Company, as well as its financial positions, and operational results, due to the capital increase and the proceeds utilization plan or projects:

In addition, it will help the Company to continue its business with strong financial status and capital base, resulting in benefits to the Company and every shareholder. As of 30 September 2018, the Company has negative equity in the amount of 647.57 million Baht. Combining this offering of ordinary shares to existing shareholders in the amount of approximately Baht 2,500,000,000, the Company has already taken into account the performance of operations in the fourth quarter of 2018 and expected that such capital increase shall be enough to run the business and help improvement of financial status to become positive again. However, there is uncertainty that the full amount of such capital increase and the financial performance in the fourth quarter of 2018 may not be reached, causing target to improve shareholders' equity can be missed.

(5) Expected effects to the Company in the case that the newly-issued ordinary shares are not fully subscribed by the existing shareholders

If the Company cannot fully offer shares to the existing shareholders proportionate to their respective shareholdings (Rights Offering), the Company will allocate the proceeds received as it deems necessary and appropriate according to the objective.
